

## Solar Storage Container Solutions

# 4850 Energy Storage BMS System

## Overview

---

The HV4850 is equipped with an intelligent battery management system (BMS) that could manage and monitor battery cell information, including voltage, current, and temperature, for easy installation and good compatibility with PCS energy storage requirements; balance the charging and discharging of the battery cells to extend the cycle life. What is Dyness battery module b4850?

Dyness battery module is equipped with intelligent BMS for each battery pack to manage modules effectively. Compared with the traditional module, B4850 offers best energy storage reliability with longer life span. The Dyness battery module B4850 is widely used in energy storage and back-up power systems.

What are the features of b4850 energy storage system?

Product Properties B4850 energy storage product's anode materials are lithium iron phosphate, battery cells are managed effectively by BMS with better performance, the system's features as below. • Comply with European ROHS, Certified SGS, employ non-toxic, non-pollution environment friendly battery.

What is b4850 lithium iron phosphate battery system?

Page 11 B4850 Safety - 11. 2.0 INTRODUCTION Brief Introduction B4850 lithium iron phosphate battery system is a standard battery system unit, customers can choose a certain number of B4850 according to their needs, by connecting parallel to form a larger capacity battery pack, to meet the user's long-term power supply needs.

What applications can b4850 modules work with?

The B4850 module is also ideal for marine and recreational vehicles (RV) applications such as camper trailers, campervans and motorhomes. Dyness is proud to announce that our B4850 modules can work with Victron/Goodwe/Imeon/Solis/Lux Power/Sofar/GMDE/Voltronic.

What is battery management system (BMS)?

**Battery Management System (BMS) 2.5.1 Voltage Protection Low Voltage Protection in Discharging:** When any battery cell voltage or total voltage is lower than the protection value during discharging, the over-discharging mode is activated, and the battery buzzer makes an alarm sound. Then battery system stops supplying power to the outside.

How do I install a b4850 unit?

- Place the B4850 unit on the cabinet bracket as shown in the figure and push the device into the cabin at the installation position. (The cabinet structure in the figure is for reference only). Secure the B4850 unit to the cabinet with a nut through the mounting holes top on the hanging ears of the B4850 unit.
- B4850 Installation - 23.

### Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 1500V
- 100% Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

### Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

### Flexible Abundant Configuration

- Plug & Play, UPS Switching Under 10ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverter Parallel
- ARC Function (Optional): when an arc fault is detected the inverter immediately stops operation
