

Solar Storage Container Solutions

Athens Energy Storage System Enterprise

Overview

How much does the storage systems in businesses program cost?

With a budget of EUR 153.7 million (\$157.7 million), the Storage Systems in Businesses program of the Ministry of Environment and Energy opened on Monday for submission of applications. The Greek Ministry of Environment and Energy said on January 13 that the Storage Systems in Businesses program is now open for applications.

How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.

Why is Greece focusing on energy storage?

Greece has been actively focusing on energy storage since the emergence of the RES “boom” in 2020. The country recognised the pivotal role of energy storage in the energy transition and emphasised its importance in the first iteration of the country’s National Energy and Climate Plan in 2019.

Is a 'fever' gripping the new energy storage sector?

An investment ‘fever’ is gripping the new energy storage sector as the ministerial decision was published yesterday (March 14, 2025), setting the rules for installations with a total capacity of 4.7 GW in our country. So far, three auctions have supported 900 MW projects with subsidies.

How much money will be allocated to small businesses in Greece?

A total of EUR 100 million in grants will be allocated for micro and small enterprises with the remaining share reserved for medium and large enterprises. All beneficiaries of the program should be existing businesses operating in the territory of Greece and established by June 30, 2024.

Who is eligible to participate in the first energy storage auction?

To be eligible to participate in the first auction, projects must hold a valid Energy Storage Licence while a set of other eligibility criteria (including soundness of the technology used and minimum power injection capacity) must be met.
