

## Solar Storage Container Solutions

# Dublin s need for outdoor power

### Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

## Overview

---

What is the powering up Dublin project?

The Powering Up Dublin project aims to update and modernise Dublin's electricity infrastructure to enable Ireland's decarbonisation goals. " Dublin's grid is currently facing congestion challenges due to its aging infrastructure and needs to be upgraded to electrify more and more of the economy and to accommodate more renewables.

What is EirGrid's powering up Dublin project?

Eirgrid's Powering Up Dublin project is designed to future proof the capital city's energy supply. Photograph: David Soanes/Getty Eirgrid's Powering Up Dublin project is aimed at enhancing the reliability of energy supply across the city and helping to future-proof its power infrastructure as further renewable generation options come on stream.

Could offshore wind power be the future of electricity in Dublin?

Offshore wind power offered the "greatest potential" to generate renewable electricity in Dublin and could produce enough power for the equivalent of 1.2 million homes by 2030 and more than three million homes by 2050, Codema said, allowing Dublin to export electricity beyond its borders.

Why do we need a new electricity grid in Dublin?

These improvements will build a more resilient and reliable grid. This helps make sure that everyone has power when and where they need it. These improvements will help meet the growing and changing electricity needs of Dublin.

Is Dublin's electricity infrastructure aging?

Dublin's electricity infrastructure is ageing and reaching its end of life. Work must be done now to transform and modernise the city's infrastructure so Dublin can continue to develop and thrive, while increasing the power from

renewable sources. In this first phase, with our project partners, we are installing over 50km of cables across Dublin.

What type of electricity is used in the Dublin region?

The Dublin Region is the major load centre on the Irish electricity transmission network, accounting for approximately one third of total demand. The existing transmission network in the Dublin Region is comprised of 220 kilovolt (kV) and 110 kV infrastructure.
