# Floodlighting Solar Light

## Overview

---

What is solar flood light?

Solar flood light is a set of independent solar system, which is composed of LED light source, solar photovoltaic panel, battery, solar controller, structural support, etc. Solar photovoltaic panels are the core part of solar floodlights and the most valuable part of solar floodlights.

How to control solar flood lights?

The solar flood lights that can be controlled via the remote controller by the user, they are generally used in household solar flood lights. In your house, people hope that the solar flood lights can be controlled by switches like the city circuit lights.

How does a solar flood light work?

When the human body movement is detected, the solar flood light will automatically adjust to full power output. When no one is moving, the solar flood light will be adjusted to dim or turn off. This can avoid unnecessary waste of power, save battery energy, and extend the lighting time.

What are the different types of solar flood lights?

There are different kinds of solar flood lights, such as solar wall motion sensor light, all in one solar flood light, split solar flood light, PIR motion sensor solar flood light. According to the different structural design, solar flood lights are divided into integrated solar flood lights and split solar flood lights.

Are solar flood lights good?

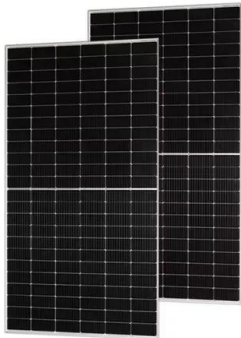

The straightforward answer is yes, solar flood lights are exceptionally good for a variety of applications. Here's why: Energy Efficiency: Solar flood lights get their power from the sun, a freely plentiful energy source. This can conserve energy and greatly lower power expenses.

What are the best outdoor solar flood lights?

All homeowners certainly want the top-rated outdoor solar flood lights. In our case, we prefer solar flood lights that are built with an upgraded PIR motion inductor, which this item has. This feature can discern movements up to 26-feet within a 120-degree angle. The innovative broad angle is a huge plus.
