What are common generator problems?

Say goodbye to generator malfunctions – and the stress that comes with them. In this blog post, we'll break down common generator problems like faulty wiring, troublesome spark plugs, oil leaks, and fuel system failures. Get step-by-step instructions on how to fix them and gain insider tips from our local generator repair service experts.

How do I troubleshoot a generator?

The first step in generator troubleshooting is to browse the Repair Clinic list of symptoms. Is your generator starting but not running smoothly?

Perhaps it's belching plumes of white smoke. Once you've identified a symptom that looks familiar, we can show you the cause of the problem.

How to fix a generator dead by daylight?

Here is a step-by-step guide on fixing the generator dead by daylight. Step1: Find the generator for which you are to repair. Step2: Stand next to the generator. Step3: Look for the "Repair" button on your screen. Step4: Hold the M1 button until the generator is fully restored. Step5: Ensure that the repair process is not interrupted.

What should I do if my generator goes out?

Check the fuel gauge and ensure there is enough power. Inspect the air filter, and clean or replace it if it's blocked. Condensed water in the fuel can also cause this problem, especially in diesel generators. Q: How can I ensure my generator runs efficiently during an outage?

How do I fix a generator not delivering current?

Step1: Re-energize the alternator. Step2: After re-energizing and the generator still does not deliver any current, replace the condenser and once again repeat the re-energizing operations. Step 3: If the problem is a short circuit, try replacing the alternator and check the electric wiring throughout.

How do I fix a leaking generator?

Consult your generator's manual to ensure you're following the correct procedure for your specific model. After replacing the damaged part, it's essential to double-check for any potential leaks. Start your generator and observe the repaired area for a few minutes to ensure the leak has been fixed.
