

Solar Storage Container Solutions

Lithuania battery pack factory

Overview

The solar module manufacturer SoliTek (Lithuania), Avesta Battery & Energy Engineering (ABEE) (Belgium) and IMECAR Elektronik (Turkey) have signed a joint venture agreement for the set up of a new battery pack production in Lithuania (Vilnius). When will the new battery pack production in Lithuania be fully operational?

The new battery pack production in Lithuania (Vilnius) is scheduled to be fully operational by January 2023.

What is Lithuania's first commercial battery storage site?

This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around 50%. The project, located near the capital city of Vilnius, is expected to be operational by the end of 2025.

When will the battery pack factory be fully operational?

The battery pack factory will be fully operational by January 2023. The new factory will have a starting production capacity of 100 MWh, which will later be scaled up towards 1 GWh in the function of the market demand. The produced battery packs will be designed for home storage, industrial and renewable applications.

Why does Lithuania need reliable energy storage?

Uloza pointed to the growing demand for reliable energy storage as Lithuania's renewable energy sector expands.

What is E-Energija doing in Lithuania?

E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility, which is set to become Lithuania's first commercial battery storage site, will significantly increase the country's storage capacity by around 50%.

What is E-Energija's battery energy storage system?

The system is expected to play a key role in optimizing the storage and distribution of renewable energy. E-energija Group has commenced construction on Lithuania's largest battery energy storage system (BESS) project, the 120MWh Vilnius BESS. This facility,
