Santo Domingo Communication Base Station Self-Generation Project

Overview

Could a water-based power plant benefit Santo Domingo?

A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise—residential housing is close to the power plant.

Which power plant is launching in Santo Domingo in 2021?

For this floating power plant, Siemens will also deliver its hybrid SIESTART solution, which is a mix of flexible (gas turbine) combined cycle power plant with a battery energy storage system. Seaboard Estrella del Mar III will commence its operations in Santo Domingo in 2021.

How will the scc-800 2x1 floating power plant benefit the Dominican Republic?

We're excited that in the end, the SCC-800 2x1 floating power plant will bring clean and green electrical energy solution to benefit more people in the Dominican Republic," said Ng Sing Chan, President, Marine, ST Engineering. Seaboard Estrella del Mar III will be installed at the customer's location in the country's capital city Santo Domingo.

What is a combined cycle power plant in Santo Domingo?

The combined cycle power plant has arrived in Santo Domingo. Watch video In rapidly growing cities, SeaFloat is a pioneering solution that ensures a reliable supply of power without taking up space on land. A growing population needs an efficient, reliable and affordable supply of power—now, and for the future.

Does Santo Domingo need a power plant?

The steady flow of electricity can support both tourism and Santo Domingo's innovative start-up scene. Nobel literature laureate Mario Vargas Llosa described the Dominican "appetite for noise" in his book *The Feast of the Goat*. A city that's already pulsating doesn't need any extra noise from a

power plant.

How will the SeaFloat Estrella del Mar III help Santo Domingo?

The SeaFloat Estrella del Mar III will help meet Santo Domingo's increasing demand for electricity and can support in case of power cuts - all without having to acquire precious land. The power plant has now arrived at its destination in the Caribbean and been placed in its final position on the Ozama River.
