Solar Road Safety Warning System

Overview

Is solar power the right choice for your traffic warning applications?

Solar power has become a strong choice for your traffic warning applications needs. Solar traffic warning systems are ideal for places where electricity may be too difficult or expensive to acquire. Solar traffic signal systems provide reliable, cost-effective, alternative solutions for these environments.

How does a solar traffic warning system work?

This wireless LED solar traffic warning system uses only solar powered electricity. With push button activation, this system turns on both sides of the road with motion. It is built with aluminum alloy board and solar board combined together.

What is a solar traffic signal system?

Solar traffic signal systems provide reliable, cost-effective, alternative solutions for these environments. Solar Lighting International, Inc. can provide you with a custom solar traffic warning system designed to fit your specific traffic management, warning flasher, or IT application.

What is a wet road sensor?

Our latest addition to our solar traffic warning safety product line is the wet road sensor. As the sensor detects the presence of water, sleet, snow, or ice it will send a signal to illuminate a flashing beacon. The flashing beacon will remain in the "ON" state until the road is clear of water, sleet, snow, or ice.

Are NXT road Chevron signs safe?

No matter how remote the location, the NxT Road will safely guide drivers through the night. NxT Road chevron signs are powered by the same cylindrical solar panels as the cutting-edge, durable Soluxio solar light post. Their vertical orientation ensures dirt or snow cannot adhere to the warning lights or solar modules.
