St Lucia Mobile Base Station Site Distribution

Overview

Does Saint Lucia still use 25 kHz channel spacing?

There still exists in Saint Lucia land mobile equipment that uses 25 kHz channel spacing, which must be accommodated in the Commission's spectrum plans. Newer frequency assignments will specify 12.5 kHz channel spacing, which is generally the norm for newer devices.

What is a mobile base station?

A mobile base station, also called a base transceiver station (BTS), is a fixed radio transceiver in any mobile communication network or wide area network (WAN). The base station connects mobile devices to the network and routes them to other terminals in the network or to the core network of a mobile operator. [Read more Explore Mobile base.](#)

What kHz bandwidth is used in Saint Lucia?

Currently allowances are made for a channel bandwidth of 8.33 kHz, although 25 kHz channel bandwidth is readily thought to be the default used in Saint Lucia. The.

What power devices does ST offer?

ST provides a complete power device portfolio, including IGBTs, thyristors, power rectifiers and MOSFETs, power modules and system-in-package (SiP) solutions to make mobile base stations more energy-efficient. Our broad range of inertial and environmental MEMS sensors can also enhance the functionality of base transceiver stations.

What is an aeronautical mobile-satellite off-route service?

Aeronautical Mobile-Satellite Off-Route (OR) Service: An aeronautical mobile satellite service intended for communications, including those relating to flight coordination, primarily outside national and international civil air routes.

Why do we need additional base stations in case a?

In Case A, a new demand is created in each period in addition to the demand of previous periods. Hence, additional base stations (BSs) may be needed to satisfy the new demand.
