Substation battery cabinet

Overview

How to choose a battery for a substation?

all work using DC power. A battery that not only packs enough energy but also provides the discharge characteristics to operate substation equipment is needed. Specify batteries with enough amp-hour capacity to support the continuous load for 8 hours and momentary load (such as breaker and switch operation) for a minute or more.

What is a substation battery?

Batteries ensure all critical substation loads will always operate. In a substation, the primary source of powercomes from your AC power supply. But you cannot completely rely on your AC power supply. If asubstation's transmission line or generation source goes offline, you'll lose power.

What types of cabinets can be used for power distribution?

We provide cabinets dedicated for power distribution purposes, which can be used in the following applications: cross-connection cabinets, wiring cabinets, control cabinets, lighting cabinets, battery cabinets, protection cabinets, telemechanics cabinets, central signalling system cabinets, metering cabinets, etc.

Do you offer custom power cabinets?

We are able to offer you fully customized power cabinets for your requirements. The enclosures are provided with electrical equipment according to in-house designs or solutions developed by other design offices according to customers' specifications.
