What is Transport for London's data network & telecoms services?

1) Background: Transport for London's (TfL) data network and telecoms services underpin everything we do. Without them we cannot run any of our transport services or collect revenue. Since around 2017, we have been guided by an overarching strategy in relation to our data networks and telecoms services.

Which data networks are being replaced by a consolidated high capacity optical network?

This data network connectivity is currently provided by three data networks (MPLS, ATM and SDH) however these three networks are currently being replaced by a new, consolidated high capacity optical network which has been designed to maximise future utility. 2) Future Procurement:.

What is a TfL connectivity services lot?

i. a TfL Connectivity Services lot: this will likely bring together the WAN elements of the Connect Contract and the LAN and Wi-Fi elements of the

AN&W Contract for our LU locations (delivering end-to-end "below ground" network services);
